ABOUT THE SKILL ASSESSMENT MODULES

Using the Correlations for TABE™ Preparation

The Teacher Correlations in this booklet provide you with a program for guiding your students toward mastery on the TABE (Tests of Adult Basic Education). Resources and exercises for students to complete are listed for Levels L, E, M, D, and A in Reading, Math, Language, and Spelling.

The Teacher Correlations include (1) the skills and subskills in the subject areas measured by the TABE, (2) a list of resources and assignments, (3) and a section where you can jot down NOTES on your students and/or the various SAMs resources and exercises. By matching the questions your students answer incorrectly on TABE Forms 7 and 8 and Survey Forms 7 and 8 with the relevant resources and exercises in the correlations, you can target those areas which need more work. A student's actual score and your personal knowledge of his/her work will determine the number of exercises you assign.

Measuring Student Progress on the TABE

Test Forms G & H in the SAMs program correspond to the skills evaluated on TABE Forms 7 and 8. If the number of

questions answered correctly on Test Form G or Test Form H indicates mastery, students can move on to other skills. However, if a student scores at partial mastery or nonmastery, additional lessons are needed. A test score of 80–100 percent indicates mastery; partial mastery is 60–79 percent; nonmastery is 0–59 percent. When students complete the assignments, you can reassess their proficiency with SAMs Test Form G or Test Form H. There is no specific order for administering these parallel tests.

For Your Information

The Study Plans provide a space for students to record their education and employment goals and plans for achievement. By identifying a future direction, students can become more involved in their learning experience and you have this information to keep them on track toward mastery on the TABE.
