Goal 4: Concepts Of Chemistry

The student will demonstrate the ability to use scientific skills and processes (Core Learning

Goal 1) to explain composition and interactions of matter in the world in which we live.

EXPECTATION

4.1 The student will explain that atoms have structure and this structure serves as the basis for the properties of elements and the bonds that they form.

INDICATOR

4.1.1 The student will analyze the structure of the atom and describe the characteristics of the particles found there.

Assessment limits:

- subatomic particles (protons, neutrons, & electrons –not to include quantum mechanical details of electron configurations)
- nucleus & electron cloud (definition; no orbitals included)
- atomic number, mass number, and isotopes (definitions; calculate numbers of protons, neutrons, and electrons; notations)
- atomic mass (qualitative concept of weighted average only; atomic mass unit)
- neutral atom
- historical development and/or experimental evidence for the existence and structure of the atom (Democritus, Dalton, Thomson, Rutherford, Bohr, electron cloud model)

Student Edition:
