

Publisher:	Glencoe/McGraw-Hill
Program Title:	<i>Life Science</i> © 2008
Components:	Student Edition (SE) Teacher Wraparound Edition (TWE)
Grade Level(s):	9th - 12th Grade
Intended Audience:	DISCIPLINE - <b>BIOLOGY</b>

**Standards Map - Basic Comprehensive Program  
Grades Nine Through Twelve - Science**

Pursuant to the State Board approved, *Science Content Standards for California Public Schools, Kindergarten Through Grade Twelve*  
Standards that all students are expected to achieve in the course of their studies are unmarked.  
Standards that all students should have the opportunity to learn are marked with an asterisk (\*).

			Introduced	Practiced	Taught to Mastery	Y	N	
<b>DISCIPLINE</b>		<b>BIOLOGY/LIFE SCIENCES</b>						
		<b>Cell Biology</b> The fundamental life processes of plants and animals depend on a variety of chemical reactions that occur in specialized areas of the organism's cells. As a basis for understanding this concept:						
9-12	1a	Students know cells are enclosed within semipermeable membranes that regulate their interaction with their surroundings.	SE: 40	SE: 74-77, 79-80, 89, 187 TWE: 74-77, 79-80	SE: 70-79, 89, 187 TWE: 74-77, 79			
9-12	1b	Students know enzymes are proteins that catalyze biochemical reactions without altering the reaction equilibrium and the activities of enzymes depend on the temperature, ionic conditions, and the pH of the surroundings.	SE: 71, 80-83, 653 TWE: 71	SE: 71, 83, 524-528, 653 TWE: 71, 524-525	SE: 80-83, 112, 524-528, 653 TWE: 524-525			

\*\* For more information, see Notes.

Science 9-12th Grade Standards Map -- Approved by the State Board of Education on Feb. 6, 2002.

For questions, contact Kathy Jacobsen, CFIR Division, California Department of Education ©, (916) 657-4892

Grade	Standard #	Text of Standard	PUBLISHER CITATIONS**			Meets Standard		Local Education Agency Evaluator Notes
			Introduced	Practiced	Taught to Mastery	Y	N	
9-12	1c	Students know how prokaryotic cells, eukaryotic cells (including those from plants and animals), and viruses differ in complexity and general structure.	SE: 39, 52, 658 TWE: 39	SE: 52-54, 658	SE: 39, 52-55, 187, 658, 662-663 TWE: 39			
9-12	1d	Students know the central dogma of molecular biology outlines the flow of information from transcription of ribonucleic acid (RNA) in the nucleus to translation of proteins on ribosomes in the cytoplasm.	SE: 40-42 TWE: 40	SE: 112-114 TWE: 112-113	SE: 112-115 TWE: 112-113, 115			
9-12	1e	Students know the role of the endoplasmic reticulum and Golgi apparatus in the secretion of proteins.	SE: 43 TWE: 43	SE: 43 TWE: 43	SE: 43 TWE: 43			
9-12	1f	Students know usable energy is captured from sunlight by chloroplasts and is stored through the synthesis of sugar from carbon dioxide.	SE: 42	SE: 82, 85 TWE: 82	SE: 304-307 TWE: 304-307			
9-12	1g	Students know the role of the mitochondria in making stored chemical-bond energy available to cells by completing the breakdown of glucose to carbon dioxide.	SE: 42 TWE: 42	SE: 307-309 TWE: 307-308	SE: 307-309 TWE: 307-308			
9-12	1h	Students know most macromolecules (polysaccharides, nucleic acids, proteins, lipids) in cells and organisms are synthesized from a small collection of simple precursors.	SE: 71, 113 TWE: 113	SE: 513-515 TWE: 513	SE: 513-515 TWE: 513			
9-12	1i*	Students know how chemiosmotic gradients in the mitochondria and chloroplast store energy for ATP production.	See Glencoe's <i>Biology</i> California Edition © 2007.					

\*\* For more information, see Notes.

			PUBLISHER CITATIONS**			FOR LEA USE ONLY		
Grade	Standard #	Text of Standard	Introduced	Practiced	Taught to Mastery	Meets Standard		Local Education Agency Evaluator Notes
						Y	N	
9-12	1j*	Students know how eukaryotic cells are given shape and internal organization by a cytoskeleton or cell wall or both.	SE: 39 TWE: 39	SE: 39-40, 187, 190, 240-243 TWE: 39, 243	SE: 39-40, 187, 190, 240-243 TWE: 39, 243			
		<b>Genetics</b> Mutation and sexual reproduction lead to genetic variation in a population. As a basis for understanding this concept:						
9-12	2a	Students know meiosis is an early step in sexual reproduction in which the pairs of chromosomes separate and segregate randomly during cell division to produce gametes containing one chromosome of each type.	SE: 105	SE: 105-107 TWE: 106-107	SE: 105-107, 109 TWE: 106-107, 109			
9-12	2b	Students know only certain cells in a multicellular organism undergo meiosis.	SE: 104	SE: 104-105 TWE: 105	SE: 104-105 TWE: 105			
9-12	2c	Students know how random chromosome segregation explains the probability that a particular allele will be in a gamete.	SE: 127 TWE: 127	SE: 127-136 TWE: 127, 129, 130, 132-133, 135	SE: 127-136 TWE: 127, 129, 130, 132-133, 135			
9-12	2d	Students know new combinations of alleles may be generated in a zygote through the fusion of male and female gametes (fertilization).	SE: 104, 633 TWE: 105	SE: 104-105, 107, 126-127, 633 TWE: 105	SE: 104-105, 107, 126-127, 633 TWE: 105			
9-12	2e	Students know why approximately half of an individual's DNA sequence comes from each parent.	SE: 126-127 TWE: 127	SE: 126-127 TWE: 127	SE: 126-127, 132 TWE: 127			
9-12	2f	Students know the role of chromosomes in determining an individual's sex.	SE: 138	SE: 138	SE: 138			

\*\* For more information, see Notes.

Grade	Standard #	Text of Standard	PUBLISHER CITATIONS**			FOR LEA USE ONLY		
			Introduced	Practiced	Taught to Mastery	Meets Standard		Local Education Agency Evaluator Notes
						Y	N	
9-12	2g	Students know how to predict possible combinations of alleles in a zygote from the genetic makeup of the parents.	SE: 128-132 TWE: 128-132	SE: 128-132, 135, 139 TWE: 128-133	SE: 128-132, 135, 139-140 TWE: 128-133			
9-12	3	A multicellular organism develops from a single zygote, and its phenotype depends on its genotype, which is established at fertilization. As a basis for understanding this concept:						
9-12	3a	Students know how to predict the probable outcome of phenotypes in a genetic cross from the genotypes of the parents and mode of inheritance (autosomal or X-linked, dominant or recessive).	SE: 128-132, 135, 139 TWE: 128-133	SE: 128-132, 135, 139 TWE: 128-133	SE: 128-132, 135, 139 TWE: 128-133, 138-139			
9-12	3b	Students know the genetic basis for Mendel's laws of segregation and independent assortment.	SE: 126-129 TWE: 127, 129	SE: 127-133 TWE: 127, 129-133	SE: 127-132 TWE: 127, 129-132			
9-12	3c*	Students know how to predict the probable mode of inheritance from a pedigree diagram showing phenotypes.	SE: 139-140 TWE: 139	SE: 139-140 TWE: 139	SE: 139-140 TWE: 139			
9-12	3d*	Students know how to use data on frequency of recombination at meiosis to estimate genetic distances between loci and to interpret genetic maps of chromosomes.	See Glencoe's <i>Biology</i> California Edition © 2007.					

\*\* For more information, see Notes.

Science 9-12th Grade Standards Map -- Approved by the State Board of Education on Feb. 6, 2002.

Grade	Standard #	Text of Standard	PUBLISHER CITATIONS**			FOR LEA USE ONLY		
			Introduced	Practiced	Taught to Mastery	Meets Standard		Local Education Agency Evaluator Notes
						Y	N	
9-12	4	Genes are a set of instructions encoded in the DNA sequence of each organism that specify the sequence of amino acids in proteins characteristic of that organism. As a basis for understanding this concept:						
9-12	4a	Students know the general pathway by which ribosomes synthesize proteins, using tRNAs to translate genetic information in mRNA.	SE: 112-113 TWE: 113	SE: 112-114 TWE: 113	SE: 112-114 TWE: 113			
9-12	4b	Students know how to apply the genetic coding rules to predict the sequence of amino acids from a sequence of codons in RNA.	SE: 111-113 TWE: 113	SE: 111-113 TWE: 113	SE: 111-113 TWE: 113			
9-12	4c	Students know how mutations in the DNA sequence of a gene may or may not affect the expression of the gene or the sequence of amino acids in an encoded protein.	SE: 114 TWE: 114	SE: 114-115, 137-139 TWE: 114, 137	SE: 114-115, 137-140 TWE: 114, 137			
9-12	4d	Students know specialization of cells in multicellular organisms is usually due to different patterns of gene expression rather than to differences of the genes themselves.	SE: 114	SE: 114	SE: 114			
9-12	4e	Students know proteins can differ from one another in the number and sequence of amino acids.	SE: 113 TWE: 113	SE: 113 TWE: 113	SE: 113 TWE: 113			
9-12	4f*	Students know why proteins having different amino acid sequences typically have different shapes and chemical properties.	See Glencoe's <i>Biology</i> California Edition © 2007.					

\*\* For more information, see Notes.

			Introduced	Practiced	Taught to Mastery	Meets Standard		Local Education Agency Evaluator Notes
						Y	N	
9-12	5	The genetic composition of cells can be altered by incorporation of exogenous DNA into the cells. As a basis for understanding this concept:						
9-12	5a	Students know the general structures and functions of DNA, RNA, and protein.	SE: 111-113 TWE: 110-113	SE: 111-113 TWE: 110-113	SE: 111-113 TWE: 110-113			
9-12	5b	Students know how to apply base-pairing rules to explain precise copying of DNA during semiconservative replication and transcription of information from DNA into mRNA.	SE: 112-113 TWE: 113	SE: 112-113 TWE: 113	SE: 112-113 TWE: 113			
9-12	5c	Students know how genetic engineering (biotechnology) is used to produce novel biomedical and agricultural products.	SE: 141-143, 228, 294 TWE: 142, 228, 294	SE: 141-143, 228, 294 TWE: 142, 228, 294	SE: 141-143, 228, 294 TWE: 142, 228, 294			
9-12	5d*	Students know how basic DNA technology (restriction digestion by endonucleases, gel electrophoresis, ligation, and transformation) is used to construct recombinant DNA molecules.	SE: 141	SE: 141-142 TWE: 142	SE: 141-143 TWE: 142-143			
9-12	5e*	Students know how exogenous DNA can be inserted into bacterial cells to alter their genetic makeup and support expression of new protein products.	SE: 141	SE: 141-143 TWE: 142	SE: 141-143 TWE: 142-143			
		<b>Ecology</b> Stability in an ecosystem is a balance between competing effects. As a basis for understanding this concept:						
9-12	6a	Students know biodiversity is the sum total of different kinds of organisms and is affected by alterations of habitats.	SE: 684-685 TWE: 685	SE: 684-685, 740-743 TWE: 685, 741-743	SE: 684-685, 740-743 TWE: 685, 741-743			

\*\* For more information, see Notes.

Grade	Standard #	Text of Standard	PUBLISHER CITATIONS**			FOR LEA USE ONLY		
			Introduced	Practiced	Taught to Mastery	Meets Standard		Local Education Agency Evaluator Notes
						Y	N	
9-12	6b	Students know how to analyze changes in an ecosystem resulting from changes in climate, human activity, introduction of nonnative species, or changes in population size.	SE: 743 TWE: 694, 743	SE: 702-703, 743, 752 TWE: 694, 702-703, 743, 752	SE: 743, 752 TWE: 694, 743, 752			
9-12	6c	Students know how fluctuations in population size in an ecosystem are determined by the relative rates of birth, immigration, emigration, and death.	SE: 692	SE: 692-695, 702-703 TWE: 696-697, 702-703	SE: 692-695 TWE: 696-697, 702-703			
9-12	6d	Students know how water, carbon, and nitrogen cycle between abiotic resources and organic matter in the ecosystem and how oxygen cycles through photosynthesis and respiration.	SE: 305, 306, 720-725 TWE: 307-309, 721-725	SE: 305-309, 720-725 TWE: 307-308, 721-725	SE: 305-309, 720-725 TWE: 307-309, 721-725			
9-12	6e	Students know a vital part of an ecosystem is the stability of its producers and decomposers.	SE: 696-697	SE: 696-697	SE: 696-697			
9-12	6f	Students know at each link in a food web some energy is stored in newly made structures but much energy is dissipated into the environment as heat. This dissipation may be represented in an energy pyramid.	SE: 727 TWE: 727	SE: 727-729 TWE: 727-728	SE: 727-729 TWE: 727-729			
9-12	6g*	Students know how to distinguish between the accommodation of an individual organism to its environment and the gradual adaptation of a lineage of organisms through genetic change.	SE: 158-159	SE: 158-159 TWE: 158	SE: 158-159 TWE: 158

						Y	N	
		<b>Evolution</b> The frequency of an allele in a gene pool of a population depends on many factors and may be stable or unstable over time. As a basis for understanding this concept:						
9-12	7a	Students know why natural selection acts on the phenotype rather than the genotype of an organism.	SE: 156-157	SE: 156-157 TWE: 157	SE: 156-157 TWE: 157			
9-12	7b	Students know why alleles that are lethal in a homozygous individual may be carried in a heterozygote and thus maintained in a gene pool.	SE: 130-131	SE: 130-133 TWE: 130	SE: 130-133 TWE: 130, 132			
9-12	7c	Students know new mutations are constantly being generated in a gene pool.	SE: 114-115	SE: 114-115 TWE: 114	SE: 114-115, 137 TWE: 114, 137			
9-12	7d	Students know variation within a species increases the likelihood that at least some members of a species will survive under changed environmental conditions.	SE: 158	SE: 158-159, 174-175 TWE: 158, 175	SE: 158-159 TWE: 158			
9-12	7e*	Students know the conditions for Hardy-Weinberg equilibrium in a population and why these conditions are not likely to appear in nature.	See Glencoe's <i>Biology</i> California Edition © 2007.					

\*\* For more information, see Notes.

						Y	N	
9-12	7f*	Students know how to solve the Hardy-Weinberg equation to predict the frequency of genotypes in a population, given the frequency of phenotypes.	See Glencoe's <i>Biology</i> California Edition © 2007.					
9-12	8	Evolution is the result of genetic changes that occur in constantly changing environments. As a basis for understanding this concept:						
9-12	8a	Students know how natural selection determines the differential survival of groups of organisms.	SE: 156-157	SE: 156-159, 162 TWE: 156-157	SE: 156-159 TWE: 156-157			
9-12	8b	Students know a great diversity of species increases the chance that at least some organisms survive major changes in the environment.	SE: 158	SE: 158	SE: 158			
9-12	8c	Students know the effects of genetic drift on the diversity of organisms in a population.	SE: 159	SE: 159	SE: 159			
9-12	8d	Students know reproductive or geographic isolation affects speciation.	SE: 159	SE: 159	SE: 159			
9-12	8e	Students know how to analyze fossil evidence with regard to biological diversity, episodic speciation, and mass extinction.	SE: 163, 167	SE: 163-167, 171, 228, 397,	SE: 163-167, 171, 228, 397,

<b>DISCIPLINE</b>		<b>INVESTIGATION AND EXPERIMENTATION</b> Scientific progress is made by asking meaningful questions and conducting careful investigations. As a basis for understanding this concept and addressing the content in the other four strands, students should develop their own questions and perform investigations. Students will:						
9-12	1a	Select and use appropriate tools and technology (such as computer-linked probes, spreadsheets, and graphing calculators) to perform tests, collect data, analyze relationships, and display data.	SE: 46, 56-57, 103, 116-117, 262-263, 446-447, 502-503, 760-761	SE: 46, 56-57, 103, 116-117, 262-263, 446-447, 502-503, 760-761	SE: 46, 56-57, 103, 116-117, 262-263, 446-447, 502-503, 760-761			
9-12	1b	Identify and communicate sources of unavoidable experimental error.	TWE: 29, 37, 87, 145, 175, 293, 319, 419, 531, 559, 643	TWE: 29, 37, 87, 145, 175, 293, 319, 419, 531, 559, 643	TWE: 29, 37, 87, 145, 175, 293, 319, 419, 531, 559, 643			
9-12	1c	Identify possible reasons for inconsistent results, such as sources of error or uncontrolled conditions.	SE: 318-319, 672-673, 702-703 TWE: 29, 37, 87, 145, 175, 419, 531	SE: 318-319, 672-673, 702-703 TWE: 29, 37, 87, 145, 175, 419, 531	SE: 318-319, 672-673, 702-703 TWE: 29, 37, 87, 145, 175, 419, 531			
9-12	1d	Formulate explanations by using logic and evidence.	SE: 28-29, 174-175, 292-293, 310, 530-531	SE: 28-29, 174-175, 292-293, 310, 530-531	SE: 28-29, 174-175, 292-293, 310, 530-531

			PUBLISHER CITATIONS**			Meets Standard		FOR LEA USE ONLY
Grade	Standard #	Text of Standard	Introduced	Practiced	Taught to Mastery	Y	N	Local Education Agency Evaluator Notes
9-12	1e	Solve scientific problems by using quadratic equations and simple trigonometric, exponential, and logarithmic functions.	SE: 487	SE: 487	SE: 487			
9-12	1f	Distinguish between hypothesis and theory as scientific terms.	SE: 8, 10 TWE: 10	SE: 8, 10 TWE: 10	SE: 8, 10 TWE: 10			
9-12	1g	Recognize the usefulness and limitations of models and theories as scientific representations of reality.	SE: 133, 792-793 TWE: 133, 792-793	SE: 133, 792-793 TWE: 133, 792-793	SE: 133, 792-793 TWE: 133, 792-793			
9-12	1h	Read and interpret topographic and geologic maps.	See Glencoe's <i>Earth Science</i> © 2008.					
9-12	1i	Analyze the locations, sequences, or time intervals that are characteristic of natural phenomena (e.g., relative ages of rocks, locations of planets over time, and succession of species in an ecosystem).	SE: 160, 166, 740- 743 TWE: 160, 165, 166, 740-743	SE: 160, 166, 740- 743 TWE: 160, 165, 166, 740-743	SE: 160, 166, 740- 743 TWE: 160, 165, 166, 740-743			
9-12	1j	Recognize the issues of statistical variability and the need for controlled tests.	SE: 133, 292-293 TWE: 133	SE: 133, 292-293 TWE: 133	SE: 133, 292-293 TWE: 133			
9-12	1k	Recognize the cumulative nature of scientific evidence.	SE: 19-21, 51, 126-143, 154-161, 612-613, 657-660 TWE: 156	SE: 19-21, 51, 126-143, 154-161, 612-613, 657-660 TWE: 156	SE: 19-21, 51, 126-143, 154-161, 612-613, 657-660 TWE: 156

Science 9-12th Grade Standards Map -- Approved by the State Board of Education on Feb. 6, 2002.

Grade	Standard #	Text of Standard	PUBLISHER CITATIONS**			FOR LEA USE ONLY		
			Introduced	Practiced	Taught to Mastery	Meets Standard		Local Education Agency Evaluator Notes
						Y	N	
9-12	1l	Analyze situations and solve problems that require combining and applying concepts from more than one area of science.	SE: 21, 42, 73, 167, 338, 429, 606, 685, 718, 750 TWE: 165, 166	SE: 21, 42, 73, 167, 338, 429, 606, 685, 718, 750 TWE: 165, 166	SE: 21, 42, 73, 167, 338, 429, 606, 685, 718, 750 TWE: 165, 166			
9-12	1m	Investigate a science-based societal issue by researching the literature, analyzing data, and communicating the findings. Examples of issues include irradiation of food, cloning of animals by somatic cell nuclear transfer, choice of energy sources, and land and water use decisions in California.	SE: 248, 262-263, 282, 294, 760-761 TWE: 248, 501	SE: 248, 262-263, 282, 294, 760-761 TWE: 248, 501	SE: 248, 262-263, 282, 294, 760-761 TWE: 248, 501			
9-12	1n	Know that when an observation does not agree with an accepted scientific theory, the observation is sometimes mistaken or fraudulent (e.g., the Piltdown Man fossil or unidentified flying objects) and that the theory is sometimes wrong (e.g., the Ptolemaic model of the movement of the Sun, Moon, and planets).	SE: 19, 51, 155	SE: 19, 51, 155	SE: 19, 51, 155
