Teamwork Guidelines

Directions: When working in cooperative learning groups, you are working for team goals instead of working for individual goals. The success or failure of the whole team depends on each member. Write a set of guidelines for your team. Use the following guidelines to get you started.

- Listen while others are speaking.
- Respect other people and their ideas.
- Stay on task.
- Be responsible for your own actions and responsibilities.
- Speak quietly and respectfully.
- Encourage other group members to participate.
- Check for understanding.
- Disagree constructively.
- Work toward a group consensus.
- Criticize ideas not people.

Your group's guidelines:
