Chapter 2 – Financial Aspects of Career Planning

1. Ask the students to research the benefits available to Standard & Poor's employees. Then have them analyze which benefits they think are the most important to have and explain why.
2. Have the students research a Web site from another company in the financial services field. Compare the types of career opportunities on this site with those on the Standard & Poor's site.
3. Ask the students to brainstorm a list of things they would need to do now to prepare for a future career with Standard & Poor's.
