

Review Game

(Use with Lesson 4-1)

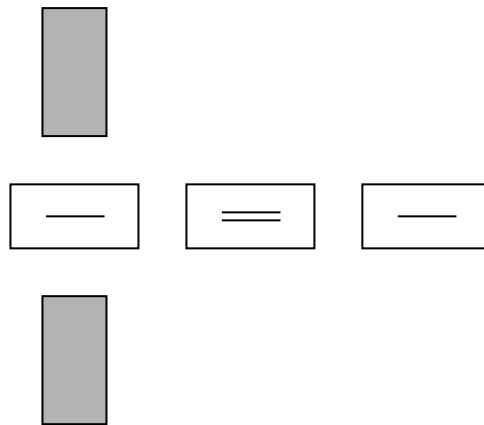

Ratio Race

Materials: index cards, 60-second timer

In this game for 2 or more players, you must complete a given proportion.

Label the index cards with the numbers from 1 to 30, one number per card. Draw a horizontal line on two cards (to serve as a fraction bar) and an equals sign on another card.

Shuffle the number cards thoroughly. Deal two number cards face down and arrange them as shown.

- To begin play, turn the two number cards face up and start the 60-second timer.
- Players list as many ratios as possible that would form a proportion with the given ratio.
- At the end of 60 seconds, players compare their lists of ratios and eliminate from their lists any ratios that appear on another player's list. Players receive 1 point for each remaining ratio on their lists.

Repeat as desired with new number cards to form new ratios. Keep a running tally of your score from each round. The winner is the player with the highest accumulated score.
