

Review Game

(Use with Lesson 3-5)

Equation Bingo

Materials: pencil 

When the teacher tells you to start, choose any equation and solve it. Find the solution on the Bingo Card below, put the number of the equation in the small box, and cross out the solution. Continue solving equations and marking solutions. The first student to cross out all of the numbers in any row, column, or diagonal wins the game. The winner must have the correct equation number for each solution in the completed row, column, or diagonal.

1. $5a - 6 = 14a + 21$
2. $3(g + 4) - 5 = g$
3. $7 - 2b = 3b - 3$
4. $8x - 3 = 4x + 9$
5. $8c + 16 = 5c - 8$
6. $5 - 12v = 10 - 7v$
7. $g + 14 = 5g - 6$
8. $\frac{1}{3}(y - 7) = 2y + 6$
9. $18 + 4p = 6p + 11$
10. $5h + 4 = 7h + 8$
11. $11d - 14 = 7 + 14d$
12. $31 - 4w = 10w + 10$
13. $-16 - f = 16 - 5f$
14. $3(2s - 5) + 4s = 10$
15. $k - 9 = 3(k - 2)$
16. $20m - 5 = 5m - 65$
17. $2t + 9 = 7t - 11$
18. $6 - 3r = r + 2$
19. $8g + 12 = 5g - 6$
20. $5 + 6x = 8x - 13$
21. $\frac{z}{3} - 6 = -9$
22. $4 - 6a = 2a + 24$
23. $2(-1 + 5x) = 8x - 1$
24. $\frac{1}{2}(5q + 8) = 4q - 5$
25. $2n + 20 = 55 - 3n$
