

The Amazing Triangle

Problem-of-the-Week

The Problem

Find the path to the center of this triangular maze. Work on a copy of this card.

Strategies and Hints

More than one solution is possible.

1. The maze might be divided into thirds as shown at the right. During your “walk” through the maze you might spend almost all of your time in just one of the three parts.
2. During your walk, you might travel the entire outermost “corridor” of the maze.
3. Create a maze of your own. Be sure to put in some “dead ends.”
