

Name _____ Date _____

Chapter 4 Review

Family Album Math

1. Ask your parent or other family member to help you collect data from your family. Make a table of the names and ages of at least ten people in your family.
2. Find the mean and mode of the data in your table.
3. Find the range, median, upper and lower quartiles, and the interquartile range for your data.
4. What do you think is an appropriate display for your data: table, histogram, bar graph, circle graph, line plot, or scatter plot? Explain the reasons for your choice.
5. Display the data for your family using the graphic method you chose in the previous question.

Answers are located on page 121.
