Chapter 5 Review

Triangle Treasure Hunt

Search this figure to find the triangles described.

1. Find two triangles that the markings indicate are congruent by SSS and write the congruence statement.

2. Find a different pair of triangles that are congruent by SAS and write the congruence statement.

3. Find two triangles that are similar but not congruent and write the similarity statement.

4. Draw and mark a figure that has two triangles that are congruent by ASA. Then ask your parent to find and name the two congruent triangles.

Answers are located on page 121.
