

Glossary Term	Definition
algebraic expression	An expression consisting of one or more numbers and variables along with one or more arithmetic operations.
alternate exterior angles	<p>In the figure, transversal t intersects lines ℓ and m. $\angle 1$ and $\angle 7$, and $\angle 2$ and $\angle 8$ are <i>alternate exterior angles</i>.</p> 
alternate interior angles	<p>In the figure, transversal t intersects lines ℓ and m. $\angle 3$ and $\angle 5$, and $\angle 4$ and $\angle 6$ are <i>alternate interior angles</i>.</p> 
altitude	<p>A line segment perpendicular to the base of a figure with endpoints on the base and on the vertex opposite the base.</p> 
altitude of a trapezoid	<p>A segment perpendicular to the lines containing the bases.</p> 
altitude of a triangle	<p>A perpendicular segment in which one endpoint is a vertex of the triangle and the other is a point on the side opposite the vertex.</p>
