

Glencoe Curriculum Portfolio Activities—Unit 8

Social Studies 1

Create a database showing the programs begun under the first New Deal and the second New Deal.

Following his inauguration as president in 1933, Franklin D. Roosevelt worked with Congress to enact a number of new programs, called the New Deal. Create a database that shows each of the programs in the First and Second New Deals. List the initials for each program, the year it was begun, and its purpose. You may wish to refer to *Glencoe: The American Journey* for this information. You may also wish to conduct outside research on the Internet.

When you have finished, organize the programs in the first New Deal alphabetically by the program's initials.
