

CHAPTER 15 HUMAN HEREDITY

Section 15.1 Simple Mendelian Inheritance of Human Traits

Section 15.2 Complex Inheritance of Human Traits

Complete the Idea Map

Complete the idea map below. Write the names of the genetic disorders described in Chapter 15 in the correct circles. One circle has been filled in for you.

Review the descriptions of the genetic disorders in Chapter 15. Then use the names of the genetic disorders from the idea map to fill in the blanks in the statements below.

- _____ disease is inherited as a dominant trait.
- Infants with _____ are given a special diet.
- A person with _____ has red blood cells shaped like a half-moon.
- Older mothers are more likely to give birth to infants with _____.
- An X-linked disorder causes problems with blood clotting. This disorder is called _____.
