CHAPTER 33 FISHES AND AMPHIBIANS

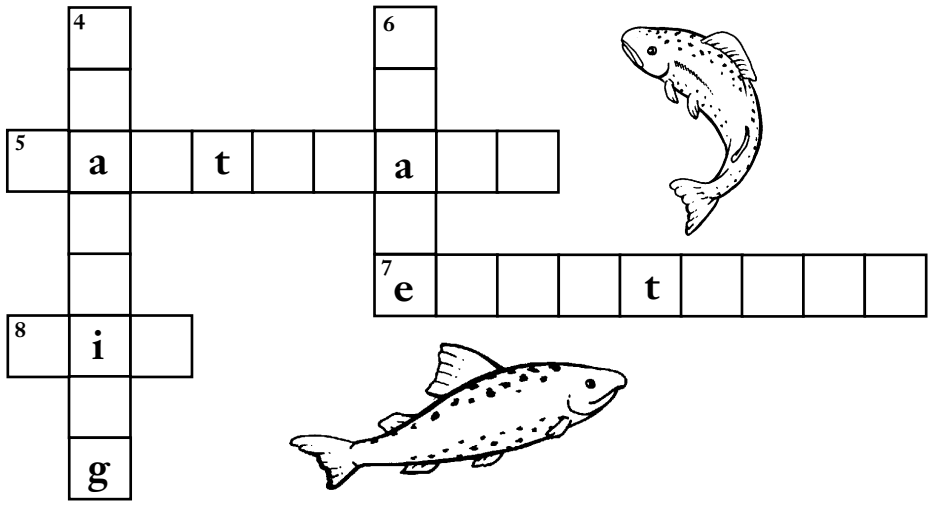
Review the Key Terms

cartilage	**ectotherm**
fin	**lateral line system**
scale	**spawning**
swim bladder	**vocal cords**

Use three of the Chapter 33 key terms listed above to fill in the blanks in the statements.

1. The _____ is a line of canals along the side of a fish that help it detect prey and find its way in the dark.
2. A(n) _____ is a gas-filled sac in bony fishes that helps them float.
3. _____ are bands of tissue in the throats of frogs and mammals. These bands enable animals to make sounds.

Use the rest of the key terms to fill in the puzzle.



ACROSS

5. tough, flexible material that forms the skeleton in animals
7. animal whose body temperature is controlled by the environment
8. fan-shaped membrane used by fishes for balance

DOWN

4. kind of breeding in fish and some other animals
6. thin, bony plate, that together with other thin, bony plates, makes up the skin covering of fishes and reptiles
