

Chapter 8

Use with Section 3

REINFORCEMENT**● Primate Evolution**

In the table below list three physical characteristics that all primates share. Then describe how each of these characteristics functions or how it is adaptive.

Characteristic	Function/Adaption

Answer the following questions.

- How do lemurs and tarsiers differ from the higher primates? _____

- How do hominids differ from monkeys and apes? _____

- In what ways do *Australopithecus* and *Homo habilis* differ? _____

- What traits did the early humans, Neanderthals and Cro-Magnons, share? _____

- What social behaviors do we share with Cro-Magnon humans? _____
