

Chapter 20

Use with Section 1

REINFORCEMENT

• What is an animal?

Each statement is an example of a characteristic shared by all animals. Write the characteristic on the line below each statement.

1. Sponges filter microscopic organisms from the water for food. _____

2. Enzymes are secreted in an earthworm's digestive tract. _____
3. Gorillas travel many miles in search of food. _____
4. The soft body of a mollusk has many different types of tissue. _____
5. Each cell of a jellyfish has a nucleus surrounded by a membrane. _____

Describe each animal shown below by using one of the following terms: radial symmetry, bilateral symmetry, or no symmetry.
