

Chapter 22

Use with Section 1

REINFORCEMENT**• Types of Behavior**

Tell which of the following examples are innate behavior and which are learned behavior. Write the word innate or learned in the space provided.

- _____ 1. Sowbugs move away from the light.
- _____ 2. A dog lies down when given a command to do so.
- _____ 3. A male stickleback fish protects its young.
- _____ 4. The pupil of a cat's eye increases in size in dim light.
- _____ 5. A seeing-eye dog leads a blind person.
- _____ 6. A dog barks twice for a bone.
- _____ 7. Spiders spin webs correctly on their first try.
- _____ 8. Birds fly south for the winter.
- _____ 9. A person rides a bicycle.
- _____ 10. A person shivers when cold.

Examples of types of behavior are given below. Identify each behavior and tell how it is helpful.

Behavior	Example	How it is helpful
	Fish will move to the place where they are fed when you tap on the tank.	
	A person tries the keys on a key ring until one works.	
	A duckling becomes socially attached to its mother.	
	A person sneezes.	
	A chimp stacks boxes to reach a banana hung out of its reach.
