

To the Parents of Glencoe Mathematics Students:

You teach your children all the time. You taught language to your infants and you read to your son or daughter. You taught them how to count and use basic arithmetic. Here are some ways you can continue to reinforce mathematics learning.

- Encourage a positive attitude toward mathematics.
- Set aside a place and a time for homework.
- Be sure your child understands the importance of mathematics achievement.

The Glencoe *California Parent and Student Study Guide Workbook* is designed to help you support, monitor, and improve your child's math performance. These worksheets are written so that you do not have to be a mathematician to help your child.

Glencoe's *California Parent and Student Study Guide Workbook* includes:

-  A complete listing of the California Mathematics Content Standards for Grade 7.
-  A correlation of Glencoe's *Mathematics: Applications and Connections*, Course 3, to the California Mathematics Content Standards, Grade 7.
-  A 1-page *worksheet* for every lesson in the Student Edition correlated to the California Mathematics Content Standards. Completing a worksheet with your child will reinforce the concepts and skills your child is learning in math class. Upside-down answers are provided right on the page.
- A 1-page *chapter review* for each chapter. These worksheets review the skills and concepts needed for success on tests and quizzes. Answers are located on pages 120–125.

For your convenience, these worksheets are also available, in a printable format, at www.glencoe.com/sec/math/mac/mathnet.
