Teacher's Guide to Using the Guide to Daily Intervention

Today it is vital that students understand the mathematics that they are learning. Using computers on the job, making good consumer choices, evaluating information, and other life skills depend upon good mathematics skills. Since no two students are exactly the same, in every classroom there will be students of various abilities and skill levels. This booklet focuses on ways that teachers can intervene to assist the struggling student to improve his or her performance. Helping all students succeed in mathematics and develop their mathematical reasoning skills is an ambitious and worthwhile goal.

In order to ensure students' success, teachers can follow a three-step process of daily intervention.

- 1. Assessment of individual student needs** Teachers need to evaluate the needs of students in order to meet those needs.
- 2. Ongoing evaluation of student progress** Monitoring students' progress and understanding on a daily basis allows a teacher to head off trouble.
- 3. Monitoring instructional activities to strengthen students' weaknesses** Providing opportunities for students to immediately address any weaknesses ensures students' continued success.

The *Glencoe Algebra* program includes tools for daily intervention in the Student Edition, the Teacher Wraparound Edition, the Teacher Classroom Resources, the Internet, and other products. Using these tools can help you help your students realize mathematical success. The following pages detail each resource available and the correlation shows how they are used in each lesson of *Glencoe Algebra 1* and *Glencoe Algebra 2*.

Daily Intervention for Oklahoma Students and Teachers

This booklet contains correlations to materials available from Glencoe/McGraw-Hill that can assist you in preparing your students for success on the Oklahoma Algebra 1 End-of-Instruction Test, including correlations between lessons in *Glencoe Algebra 1* and *Algebra 2* and the Oklahoma Algebra 1 and Algebra 2 PASS Mathematics Content Standards. Lists of these standards are included for your convenience.

In addition, this booklet contains correlations between the Student Edition of *Glencoe Algebra 1* and the following workbooks:

*Oklahoma Algebra 1
End-of-Instruction (EOI) Test
Practice and Sample Test Workbook
Student Edition*

Oklahoma Algebra 1 End-of-Instruction (EOI) Test Practice and Sample Test Workbook, Student Edition

This workbook includes practice for each PASS Mathematics Content Standard tested on the Oklahoma Algebra 1 End-of-Instruction Test, including multiple choice review questions. In addition, a sample test is provided in the workbook. Students can review the material as they progress through the textbook or use it as a review before taking the Oklahoma Algebra 1 End-of-Instruction Test.

Oklahoma Algebra 1 End-of-Instruction (EOI) Test Practice and Sample Test Workbook, Teacher's Annotated Edition

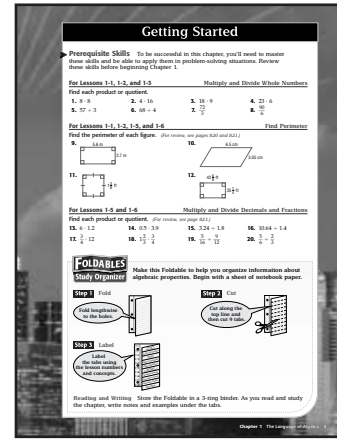

In this Teacher's Annotated Edition, answers are printed full-size, in place on the student pages of the practice and sample test pages. Each item in the sample tests is also referenced by standard. A list of the Oklahoma Algebra 1 PASS Mathematics Content Standards is included.

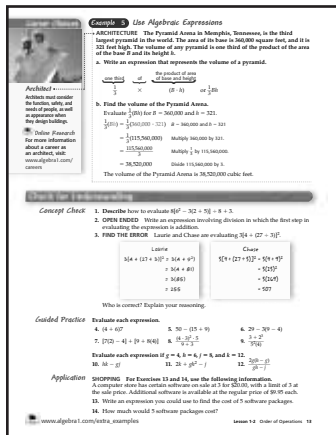

*Oklahoma Algebra 1
End-of-Instruction (EOI) Test
Practice and Sample Test Workbook
Teacher's Annotated Edition*

Daily Intervention in the Student Edition

- Every standard from the **Oklahoma Algebra 1 and Algebra 2 PASS Mathematics Content Standards** is correlated to a lesson in *Glencoe Algebra 1* and *Algebra 2*. This allows you to easily see which standards are being addressed as you teach from your textbook.
- In the Getting Started section at the beginning of each chapter in the Student Edition, the **Prerequisite Skills** check students' preparedness for the chapter. You can check prior knowledge by reviewing prerequisite topics and explaining how these prerequisite topics are related to the current concept.
- Additional practice of **Prerequisite Skills** is provided at the end of each lesson with page references to help students review the concepts. These exercises review concepts and skills that will be applied in the next lesson. The Prerequisite Skills section in the Student Handbook in the back of the Student Edition provides explanation and practice of skills that are needed for success in algebra.

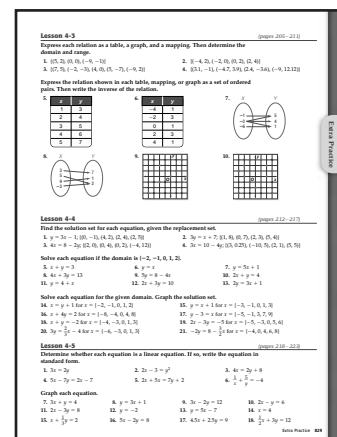

Algebra 1 Student Edition, p. 5

Algebra 1 Student Edition, p. 13

- You can use the **Check for Understanding** exercises in class to ensure that all students understand the concepts.
- **Concept Check** Students communicate their understanding of the concepts just taught by defining, describing, and explaining mathematical concepts.
- **Guided Practice** These exercises present a representative sample of the exercises in the Practice and Apply section. A key is provided in the Teacher Wraparound Edition that correlates the exercises to the corresponding examples. **Find the Error** exercises help students identify and address common errors before they occur.
- **Application** Students have the opportunity to solve a real-world or mathematical connection problem as a check for understanding.

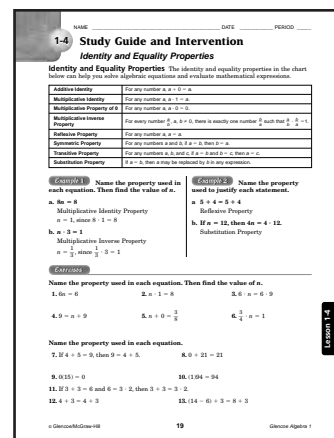

- **Extra Practice**, located in the back of the Student Edition, provides additional, immediate practice with the skills and concepts from each lesson.
- **Mixed Problem Solving**, also in the back of the Student Edition, includes numerous verbal problems for students to reinforce their problem-solving skills.

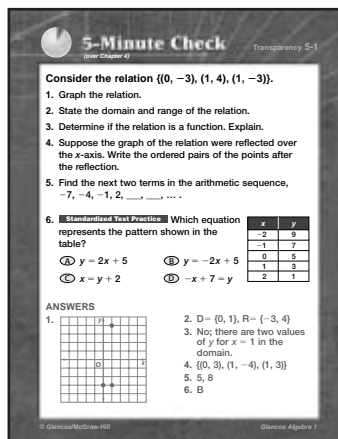

Algebra 1 Student Edition, p. 829

Daily Intervention in the Teacher Classroom Resources

- The **Study Guide and Intervention** masters found in the Chapter Resource Masters summarize key concepts for each objective and provide practice exercises. These masters are also available as a consumable **Study Guide and Intervention Workbook** in English and Spanish. You may wish to use these masters for additional instruction and practice with individual students, in cooperative groups, or in peer tutoring situations.

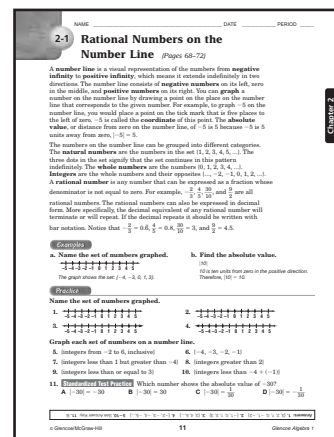

Algebra 1 Chapter 1 Resource Masters, p. 19

Algebra 1 5-Minute Check Transparency 5-1

- **5-Minute Check Transparencies with Standardized Test Practice** For each lesson, there is a full-size transparency with questions covering the previous lesson or chapter. Also included on each transparency is a Standardized Test Practice question. These provide an excellent ongoing opportunity for checking students' understanding of the mathematics they are learning.

- Parents or guardians may need specific advice for helping students make improvements. It may help to engage in frequent correspondence, encourage parental monitoring of homework, and provide parents with a schedule of students' assignments. The **Parent and Student Study Guide Workbook** contains a one-page worksheet for each lesson in the Student Edition and a one-page review for each chapter. This workbook offers an excellent opportunity for students and parents to work together to strengthen weaknesses and develop mathematical understanding.

Algebra 1 Parent and Student Study Guide Workbook, p. 11

Daily Intervention on the Internet

- **Online Study Tools** These comprehensive review and intervention tools are available anytime, anywhere, simply by logging on to:

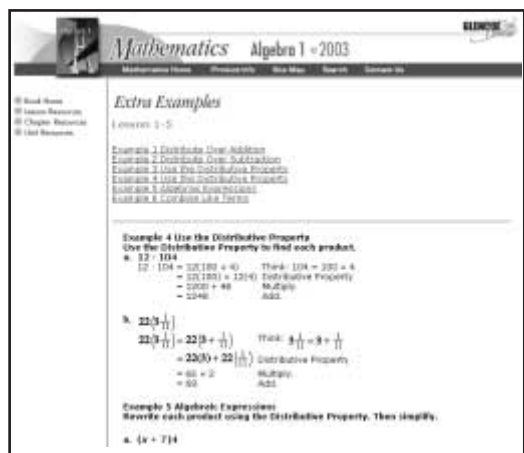

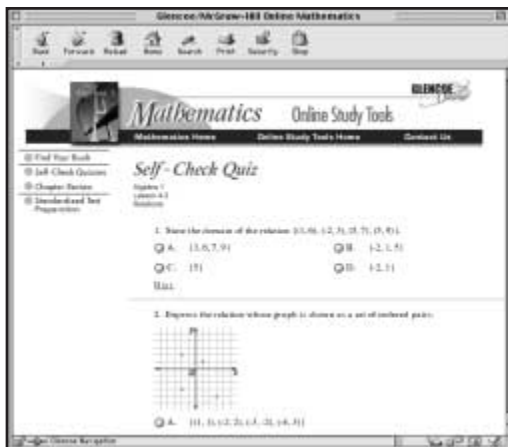

www.algebra1.com or www.algebra2.com

- **Self-Check Quizzes** are available for every lesson. Immediate feedback lets the student know whether the answers are correct and references specific pages and examples in the Student Edition for review. Access the Self-Check Quizzes directly at:

www.algebra1.com/self_check_quiz

or

www.algebra2.com/self_check_quiz

- **Extra Examples** that mimic the ones in the Student Edition are completely worked out and available for students to review at:

www.algebra1.com/extra_examples

or

www.algebra2.com/extra_examples

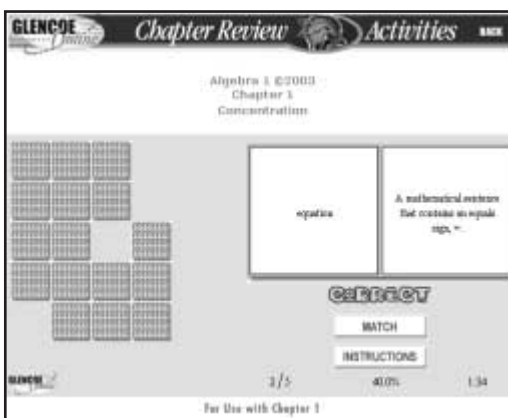

You may wish to use these examples in reteaching or to have students review areas of weakness.

- **Vocabulary Review** lets you and your students check their understanding of the terms and definitions used in each chapter. Access this game-style review at:

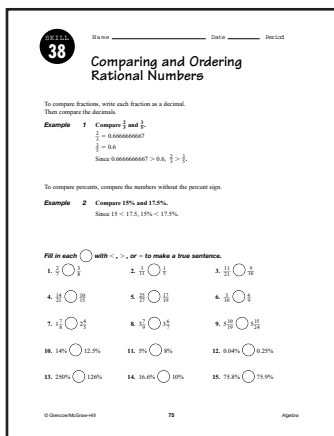

www.algebra1.com/vocabulary_review

or

www.algebra2.com/vocabulary_review

Daily Intervention with Other Resources

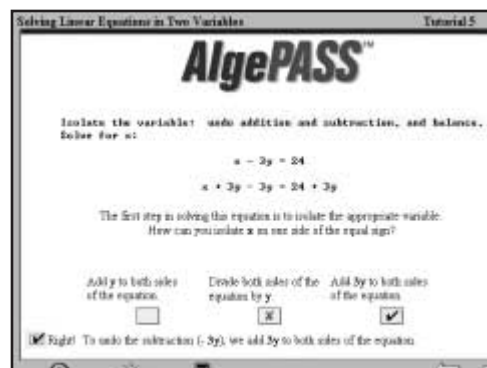

Prerequisite Skills Workbook, p. 75

- The **Prerequisite Skills Workbook** provides extra practice on basic skills that are needed for success in Algebra 1. You may use these pages to give students an opportunity to review and refresh their skills. Topics addressed include:

- Operations with Whole Numbers
- Operations with Decimals
- Operations with Fractions
- Measures in the Metric and Customary Systems
- Line Graphs
- Histograms
- Probability

- The **AlgePASS: Tutorial Plus** and **Alge2PASS: Tutorial Plus** CD-ROMs provide an interactive, self-paced tutorial for an Algebra 1 or Algebra 2 curriculum. The lessons are correlated directly to *Glencoe Algebra 1* and *Glencoe Algebra 2*. Each lesson, or concept, includes a pretest, tutorial, guided practice, and posttest. Students' answers to the pretests automatically determine whether the tutorial is needed for that concept—without taking teacher time to grade it. This software is designed to identify and address student weaknesses.

- **Quick Review Math Handbook** is Glencoe's mathematical handbook for students. The Hot Words section includes a glossary of terms while the Hot Topics section consists of explanations of key mathematical concepts. An exercise set is included to check students' understanding of the concepts. This valuable resource can be used as a reference in the classroom or for home study.

Student Remediation Plan

Teacher Instructions

You can use the Student Remediation Plan template that follows to plan for students who are in need of intervention/remediation. It can be used for high stakes tests, if there is no formal remediation plan required by your school or district. It can also be used for mid-semester reviews or project-based work.

Purpose

- To identify students' specific problem areas and link them to steps that can produce attainable results.
- To provide a template to easily record remediation plans and use them to communicate with students and/or parents.

Suggested Uses

- *Involve students in their Remediation Plans.*

Hold a teacher-student conference to go over the details of the remediation plan. Make certain they understand what they are to do, and have them sign a copy of their plan as a sign of good faith.

- *Involve parents as much as possible.*

You may also wish to involve parents in the remediation plan, if the situation is appropriate. Like your students, make sure the parents understand the steps their child should take to improve his or her performance in your class.

- *Identify common steps and resources that can be used for different levels of remedial study.*

Try to identify several sets of steps and resources for at least two different levels of student need. For example, you might identify a course of action for students who need a small amount of extra work, and one for those that need a great deal of extra study in the identified academic area.

Then, as you identify students in need of intervention, you can choose their level and the appropriate remediation plan. While you will probably want to customize the plan per student, you will at least have a defined set of steps with which to begin. After the semester ends, you can then evaluate each plan's success rate and determine what can be revised to improve each set of actions or resources.
